

MAXIMUS Software

*A complete production monitoring software
for sows, nursery and finishing.*

MAXIMUS Controller

- Environment
- Alarm Management
- Biosecurity
- Employee Management

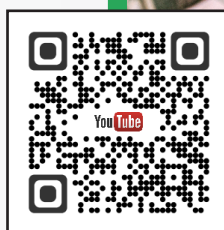

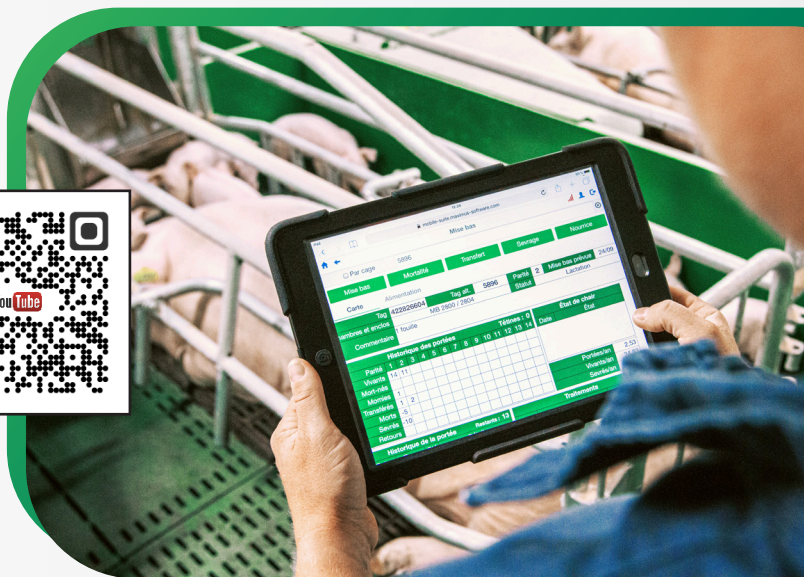

MAXIMUS Software

Simple management for connected producers.

Entirely customizable, **MAXIMUS Software** provides an OVERALL picture of your production no matter what type of controller is installed in your buildings.

Set your goals, take appropriate measures and improve your productivity.

- Data entry on mobile application
- Synchronization of production tracking for all buildings and sites
- Reporting per sow or per group
- Reports/tables shared between the producer and stakeholders (veterinarians, integrators, accountants, etc.)
- Real-time data for quick decisions and interventions
- Optimization of performance

Sows Module

- Printing of customizable sow cards
- Individual feeding according to body condition and parity
- Reports tailored to your needs
- Instant access to sow data

Nursery-Finishing Module

- Interface between feed management and accounting system
- Real-time feed management, electronic orders/invoices import
- Analysis reports (group ending, mortality, feed costs, etc.)

Save time and reduce your production costs
by using proactive management
based on real-time data.
